OBJECTIVE

I am a graduate from the University of Hull with a degree in BSc Computer Science. I am currently looking to secure a postgraduate employment role in this sector. I am located in Kent with a 50-minute commute to London and furthermore own a reliable car, thus transport is not an issue.

I specialize in Object Oriented programming, with a focus on C# and integration of various tools and frameworks such as client/server development, database integration with entity framework, Agile development, and User Interface design. I furthermore have experience in full stack web development and other more obscure sectors such as data mining/machine learning. An overview of my module history and current skills set can be seen detailed in the following sections. For each module completed throughout my time at University, the breakdown of each and what it entailed can be found on my website, listed in the header.

EDUCATION

Computer Science BSc | University of Hull

2016 – 2020

Graduated with 1st Class Honours (75.97%). Modules completed during the 2 years that contributed towards this mark alongside a respective percentage for each can be seen below.

Year 3 (Diploma Stage)

Systems Analysis, Design and Process - 67%

Software Engineering - 81%

E-Commerce and E-Business - 76%

Database Techniques - 83%

Networking and User Interface Design - 93%

Agile Software Development - 81%

Year 4 (Honours Stage)

Data Mining and Decision Systems - 73%

Mobile Devices and Applications - 68%

Distributed Systems Programming - 73%

Advanced Software Engineering - 91%

Honours Stage Project – 70%

A Level & GCSE | Cranbrook Grammar School

2010 – 2016

'A' Levels in Maths, Business Studies and History

A* GCSE ICT

SKILLS

Languages: C#, HTML, CSS, JavaScript, Java, Python, MATLAB

Frameworks: Entity Framework, ASP.Net Core MVC, Bootstrap

Databases: Microsoft SQL Server, MySQL

Tools: SVN, Postman, Trello, Android Studio (app development)

Management: Agile Development, Waterfall Development

WORK EXPERIENCE

Front of house | The Bell and Jorrocks Public House and Restaurant

SUMMER 2019

Front of house, working behind the bar, dealing with customers and transactions, and even bringing out food and ensuring an enjoyable customer experience.

Manual labour | White Box 3

SUMMER 2018

Working for the owner of a small business who needed assistance with maintenance and upkeep of their offices and estate. The role included heavy lifting and the use of machinery, working with a small team to complete/renovate a number of building projects to a tight deadline.

Outdoors Technician | Four Jays Group

SUMMER 2016 & SUMMER 2017

I worked at Four Jays Group for two consecutive summers. This work consisted of heavy lifting of equipment and furniture and the construction of marquees. This demonstrated my ability to undertake manual labour and work in a team, with a diverse group of individuals. This often entailed getting multiple jobs done at different locations on a tight schedule, which gave me experience of working under pressure and prioritising the workload.

Catering Assistant | Leeds Castle

2015 - 2016

This was a part time job during my A-Level studies. It involved serving customers hot food and drink, handling cash/credit cards and moving around heavy loads of dishes and servicing tables. This front of house role provided me with essential customer care skills.

I have also undertaken numerous unpaid work experience placements during my time at school. These included Quantity Surveying at FM Conway and getting an insight into the workings at ING group (financial services company) via a sub-contracted company called Marlborough LTD where I shadowed an IT Consultant.

ABOUT ME

I would consider myself to be an enthusiastic, confident, and polite individual. In terms of sporting activity, I enjoy playing both football and hockey and have played the latter for my University first XI. In addition to these, I maintain a key interest in keeping active and enjoy visits to the gym on a regular basis, usually 4/5 times per week. Related to my Computer Science degree, I maintain a firm interest in technology and upcoming developments in this sector. I occasionally also enjoy reading books, especially around the subject of psychology as this is something that fascinates me. Furthermore, regarding external certification, I have successfully completed the Bronze Duke of Edinburgh Award, which provided me with vital training in team-working and teaching skills, and also obtained a certificate from the University of Reading from completions of an online course via Future Learn that consisted of creation of an android mobile game and the basics of Java programming.
